

This DocWiki contains information about the following releases of Cisco Unified MeetingPlace Express, Release 2.x:

- Cisco Unified MeetingPlace Express -- Provides advanced scheduled and reservationless voice, web, and video meeting features, including the option to integrate with Microsoft Outlook.
- Cisco Unified MeetingPlace Express VT -- Provides ad hoc voice, video, and web conferencing capabilities. Ad hoc conferences are initiated through the end-user interfaces of products other than Cisco Unified MeetingPlace Express. For example, you can initiate either a voice-only or a voice-and-video ad hoc conference by using the "Meet-Me" button or the "Conf" button on Cisco Unified IP Phones that are registered to Cisco Unified Communications Manager (formerly called Cisco Unified CallManager). You can also initiate voice, video, and web conferences through Cisco Unified Personal Communicator.
