

**Main page:** [Cisco Unified MeetingPlace Express, Release 2.x](#)

**Previous page:** [Page References](#)

This page is used to modify the content and appearance of e-mail notifications.

- [Field Reference: Edit Master Template \(Advanced\)](#)
- [Editing Areas of the Edit Master Template \(Advanced\) Page](#)

**Note:** If you upgrade your system from an earlier release, the system overwrites all custom e-mail notification templates and replaces them with the standard e-mail notification templates.

## Field Reference: Edit Master Template (Advanced)

**Table: Fields on the Edit Master Template (Advanced) Page**

Field	Description	Value
Template	<p>Which template is being modified:</p> <ul style="list-style-type: none"> <li>• NotifyCancelAll-All meetings from the recurring chain cancelled</li> <li>• NotifyCancel-Meeting cancelled</li> <li>• NotifyReSchedule-Meeting rescheduled</li> <li>• NotifySchedule-New meeting scheduled</li> <li>• NotifyScheduleRes-(Outlook only) New reservationless meeting</li> <li>• EmailBlast-E-mail blast</li> </ul>	<p>EmailBlast/NotifyReSchedule/NotifyCancel/NotifyCancelAll/NotifyScheduleRes/NotifySchedule</p> <p>Default: EmailBlast</p>
Format	<p><i>For Release 2.0.x:</i> Whether to modify the HTML or text version of the template.</p> <p><i>For Release 2.1.x:</i> Whether to modify the HTML, HTML iCal, or text version of the template.</p> <p><b>Caution!</b> If you modify an e-mail notification template, you must modify all the formats to keep them consistent with each other. Otherwise, users may receive different information about the same meeting, depending on the <a href="#">E-mail format</a> setting in each user profile.</p>	<p><i>For Release 2.0.x:</i> html/text</p> <p><i>For Release 2.1.x:</i> html/text/html_iCal</p> <p>Default: html</p>
Language	The language property file to view and modify.	<p>Choose from the drop-down menu of installed and enabled languages.</p> <p>Default: en_US (U.S. English)</p>

## Editing Areas of the Edit Master Template (Advanced) Page

The Edit Master Template (Advanced) page has two editing areas:

- Left-Use the editing area on the left side of the page to modify the appearance of e-mail notifications.
  - ◆ For the HTML format, you can modify the font, size, color, and alignment of the text. You can also insert horizontal lines and hypertext links and modify the location of the graphics.
  - ◆ For the HTML\_iCal format, you cannot add embedded images.
  - ◆ The tags (\$notify\_xxxx) are defined in language property files, one of which appears on the right side of the page.
- Right-Use the editing area on the right side of the page to modify language property files, which define the language translations of the tags used in the templates.
  - ◆ Because the same tags are used in multiple templates, you should preview all templates after modifying a language property file.
  - ◆ To view or modify a different language property file, modify the Language field at the top of the page.

**Note:** The following notes apply to the graphics in e-mail notifications:

- The HTML templates display only the size and location of each graphic.
- Graphics cannot be previewed through the Administration Center and are displayed only in actual e-mail notifications.
- E-mail notification graphics cannot be modified or replaced.
- New graphics cannot be added to e-mail notifications.
