Field Reference: Profile Information

Table: Fields on the Profile Information Page

Field	Description	Value
Destination	Destination of the exported information. For descriptions, restrictions, and recommendations for each option, see the How To Export Data .	Screen/File/Printer Default: Screen
Include field header names	Whether to include the field header names in the exported file.	No/Yes Default: Yes

Output Fields of the Profile Information Page-Used for Importing User Profiles

[Table: Output Fields of the Profile Information Page-Used to Import User Profiles](#) lists, in alphabetical order, the output fields that the system displays after exporting user profile information. It also includes field descriptions and values, which are useful when you use the exported output to create import files.

Table: Output Fields of the Profile Information Page-Used to Import User Profiles

Header Field	Description	Values
Required Header Fields for Importing User Profiles		
EncryptedProfilePWD or prfpwd	<p>Encrypted profile password. See Profile password.</p> <p>If you instead want to import an unencrypted profile password, modify the import file as follows:</p> <ol style="list-style-type: none"> 1. Leave the EncryptedProfilePWD field blank for the user. 2. Add the prfpwd header field for the unencrypted profile password. <p>Requirement: This field is required in the import file only when adding user profiles by import.</p> <p>Restrictions:</p> <ul style="list-style-type: none"> • The prfpwd field does not appear in exported output. The field is used only in import files. • If the user is authenticated by an external directory, you cannot modify this field. See the Methods for Adding New User Profiles. • This field cannot be modified in the preconfigured Guest profile. 	<p>EncryptedProfilePWD: password previously encrypted by Cisco Unified MeetingPlace Express</p> <p>prfpwd: 5 to 17 numeric characters</p>
EncryptedUserPWD or upwd	<p>Encrypted user password. See User password.</p> <p>If you instead want to import an unencrypted user password, modify the import file as follows:</p> <ol style="list-style-type: none"> 1. Leave the EncryptedUserPWD field blank for the user. 2. Add the upwd header field for the unencrypted password. <p>Requirement: This field is required in the import file only when adding user profiles by import.</p> <p>Restrictions:</p>	<p>EncryptedUserPWD: password previously encrypted by Cisco Unified MeetingPlace Express</p> <p>upwd: 5 to 17 alphanumeric characters</p>

Table: Output Fields of the Profile Information Page-Used to Import User Profiles

	<ul style="list-style-type: none"> • The <u>upwd</u> field does not appear in exported output. The field is used only in import files. • Unicode is not supported. • If the user is authenticated by an external directory, you cannot modify this field. See the <u>Methods for Adding New User Profiles</u>. 	
prfnum	See <u>Profile number</u> . Requirement: This field is required in the import file whether you are adding or deleting user profiles by import.	-
uid	See <u>User ID</u> . Requirement: This field is required in the import file whether you are adding or deleting user profiles by import.	-
