

Procedure

1. Log in to Cisco Unified MeetingPlace Express and click **Administration**.
2. Do one of the following:
 - ◆ To display a certificate for the primary server, click **Certificate Management > Display Certificate**.
 - ◆ To display a certificate for the secondary server, click **System Configuration > SMA Configuration > SMA Certificate Management > SMA Display Certificate**.
The Cisco Unified MeetingPlace Express system displays the names of your certificates. If you do not have any certificates, the Cisco Unified MeetingPlace Express system displays a message stating that you have no certificates to display.
3. Select a certificate and click **Display Certificate** to open it. The system displays the contents of the certificate file.
