This page is used to install new or incremental licenses.

Table: Fields on the Install Licenses Page

Field	Description	Values
Upload new license file	Specifies to delete all previously installed licenses before installing the license file. Restriction: Select this option only when uploading licenses to your system for the first time, or in the unlikely event that you must install an entirely new set of licenses.	-
Append incremental license file	Specifies to keep all the previously installed licenses and to add additional licenses from the license file.	-
Host ID (MAC address)	(Read only) MAC address of the server. Use the value in this field to obtain licenses. See the How To Install and Manage Licenses .	-
License file to use	Directory path and filename of the license file.	To locate the file, click Browse .
