Main page: Cisco Unified MeetingPlace Express, Release 2.x

Previous page: Page References

This page allows you to enable SSL on the secondary server in Cisco Unified MeetingPlace Express.

Caution! Be sure to enter the correct values in these fields. If you inadvertently enter incorrect values, the system may need to be restarted.

Field	Description	Value
For web conferencing:		
Certificate file	Directory path and filename of the certificate file provided by a trusted CA. Restrictions: • Self-signed certificates are not supported. • The certificate must be in privacy enhanced mail (PEM) format.	To locate the file, click **Browse**.
Private key file	Directory path and filename of the private key for the certificate. **Note:** This field is typically left blank. Enter a value only if you use your own tool to generate the key and CSR, instead of using the Generate CSR page in the Administration Center.	To locate the file, click **Browse**.
Password	The password for the private key file. **Note:** You do not need to enter a password if you used the Generate CSR page to obtain the certificate.	Up to 20 characters.
For the End-User Interface and Administration Center:		
Certificate file	See Certificate file.	To locate the file, click **Browse**.
Private key file	See Private key file.	To locate the file, click **Browse**.
Password	See Password.	Up to 20 characters.
