

Main page: [Cisco Unified MeetingPlace Express, Release 2.x](#)

Previous page: [Page References](#)

This page displays the Cisco Unified MeetingPlace Express system log.

Note: These fields only appear if your Cisco Unified MeetingPlace Express system has any data for the parameters you entered.

Field	Description
Date	The date on which the event occurred.
Time	The time at which the event occurred.
Severity	The severity of the event. Can be INFO, WARN, MIN, or MAJ.
Ex	The exception code that identifies the specific type of exception. There is a 1:1 correspondence between defined exception codes and the descriptions. Note: An exception code of 0 means no exception code is defined.
File	The name of the file in which the event occurred.
Line	The line in the file on which the event occurred.
SCodes	Context-specific values that are reported along with the exception code. Note: For events with undefined exception codes, these values are used as the description.
Description	Description of the event.
