

Cisco Unified MeetingPlace Express supports a growing number of languages available for voice prompts, e-mail notifications, the End-User Interface, and web meeting rooms. Only U.S. English text is used in the Administration Center.

Languages are automatically installed with Cisco Unified MeetingPlace Express. To see which languages are installed in a specific release, see the *Release Notes for Cisco Unified MeetingPlace Express Release 2.0* or the *Release Notes for Cisco Unified MeetingPlace Express Release 2.1* on this page:

Configuring Languages Other Than U.S. English

By default, U.S. English is used in all voice prompts, e-mail notifications, end-user web interfaces, and web meeting rooms. To use a different language or to enable end users to choose from multiple languages, complete these high-level tasks.

Procedure

High-Level Task	Where to Find Instructions	
1.	(For multiple languages only) Purchase, download, and install the languages license. Without the languages license, you can only enable one language on the system. With the installed languages license, you can enable up to four languages on Cisco Unified MeetingPlace Express.	How To Install and Manage Licenses
	Enable the languages.	Enabling Installed Languages
1. 1.	(For multiple languages only) Configure language preferences in the user groups or user profiles.	Specifying a Language for User Groups or User Profiles

	Note: End users may override this setting by selecting a language through the End-User Interface or over the phone. See the <i>User Guide for Cisco Unified MeetingPlace Express Release 2.x</i> .	
1.	(For the Cisco Unified MeetingPlace Express Phone View only) Install and configure matching languages in Cisco Unified Communications Manager for the Cisco Unified IP Phones.	About Language Requirements for Cisco Unified MeetingPlace Express Phone View

Enabling Installed Languages

Before You Begin

- Purchase, download, and install the [languages](#) license. See the [How To Install and Manage Licenses](#).

Procedure

1. Log in to Cisco Unified MeetingPlace Express and click **Administration**.
2. Click **System Configuration > Usage Configuration**.
3. Configure the Language fields to enable one or more installed languages.
4. Click **Save**.
5. Restart the system by entering **sudo mpx_sys restart** in the CLI.

Note: You do not need to restart the system if you are only switching the order in which the languages appear in these fields.

Specifying a Language for User Groups or User Profiles

Before You Begin

- Enable the languages. See the [Enabling Installed Languages](#).

Restriction

- End users may override this setting by selecting a language through the End-User Interface. See the *User Guide for Cisco Unified MeetingPlace Express Release 2.x*.

Procedure

1. Log in to Cisco Unified MeetingPlace Express and click **Administration**.
2. Click **User Configuration**.
3. To configure a user group, click **User Group Management**. To configure an individual user profile, click **User Profile Management**.
4. To configure an existing user group or user profile, click **Edit**. To configure a new user group or user profile, click **Add New**.
5. Configure the Language field.
6. Click **Save**.
7. Repeat this task for all user groups and user profiles for which you want to configure language preferences.
