

This section describes the tasks that you need to complete in the Cisco Unified MeetingPlace Express Administration Center to enable web meetings to be initiated from Cisco Unified Personal Communicator.

Procedure

| High-Level Task | Where to Find Instructions |
|---|--|
| <p>Install the appropriate licenses on Cisco Unified MeetingPlace Express:</p> <ul style="list-style-type: none"> • If you install the stdsw license, also install webconf and maxstd licenses that provide enough web ports for your Cisco Unified Personal Communicator users. • If you install the systemsoftware license, also install webconf and maxweb licenses that provide enough web ports for both the full web meetings that are initiated from Cisco Unified MeetingPlace Express and the web-only meetings that are initiated from Cisco Unified Personal Communicator. | <p>Installing and Managing Licenses on the Cisco Unified MeetingPlace Express System</p> |
| <p>Enable the SSL encryption technology on the Cisco Unified MeetingPlace Express system by obtaining and uploading the required certificates from a trusted certificate authority (CA).</p> | <p>Configuring SSL and Managing Certificates for Cisco Unified MeetingPlace Express</p> |
| <p>Make sure that a Cisco Unified MeetingPlace Express user profile exists for each Cisco Unified Personal Communicator user that may initiate web-only meetings from Cisco Unified Personal Communicator.</p> <p>Typically, both Cisco Unified MeetingPlace Express and Cisco Unified Personal Communicator are integrated with either Cisco Unified CallManager or Cisco Unified Communications Manager, which handles the user authentication.</p> | <p>How to Configure User Authentication By an External Directory</p> |
