

This section describes the tasks that you need to complete in the Cisco Unified MeetingPlace Express Administration Center to enable web meetings to be initiated from Cisco Unified Personal Communicator.

#### Procedure

<b>High-Level Task</b>	<b>Where to Find Instructions</b>
<p>Install the appropriate licenses on Cisco Unified MeetingPlace Express:</p> <ul style="list-style-type: none"> <li>• If you install the <a href="#">stdsw</a> license, also install <a href="#">webconf</a> and <a href="#">maxstd</a> licenses that provide enough web ports for your Cisco Unified Personal Communicator users.</li> <li>• If you install the <a href="#">systemsoftware</a> license, also install <a href="#">webconf</a> and <a href="#">maxweb</a> licenses that provide enough web ports for both the full web meetings that are initiated from Cisco Unified MeetingPlace Express and the web-only meetings that are initiated from Cisco Unified Personal Communicator.</li> </ul>	<p><a href="#">Installing and Managing Licenses on the Cisco Unified MeetingPlace Express System</a></p>
<p>Enable the SSL encryption technology on the Cisco Unified MeetingPlace Express system by obtaining and uploading the required certificates from a trusted certificate authority (CA).</p>	<p><a href="#">Configuring SSL and Managing Certificates for Cisco Unified MeetingPlace Express</a></p>
<p>Make sure that a Cisco Unified MeetingPlace Express user profile exists for each Cisco Unified Personal Communicator user that may initiate web-only meetings from Cisco Unified Personal Communicator.</p> <p>Typically, both Cisco Unified MeetingPlace Express and Cisco Unified Personal Communicator are integrated with either Cisco Unified CallManager or Cisco Unified Communications Manager, which handles the user authentication.</p>	<p><a href="#">How to Configure User Authentication By an External Directory</a></p>
