

Cisco Unified MeetingPlace Release 6.1 > Cisco Unified MeetingPlace Phone View > Configuring

Phone View is bundled with Cisco Unified MeetingPlace Web Conferencing, installing and extracting its scripts and templates in *drive* :\Cisco Systems\MPWeb\Scripts and *drive* :\Cisco Systems\MPWeb\Template.

After Phone View is installed, you must configure Phone View by adding the Cisco Unified MeetingPlace service to Cisco Unified Communications Manager. For more information, see the [How to Configure the Cisco Unified MeetingPlace Service in Cisco Unified Communications Manager](#).
