Cisco Unified MeetingPlace H.323/SIP IP Gateway works with the Cisco Unified MeetingPlace Audio Server system to provide meeting access to callers. The gateway supports up to 960 IP connections. The Audio Server system supports connections from up to 16 IP gateway servers; this multigateway support provides network load balancing and system redundancy.

- Use Cisco Unified MeetingPlace H.323/SIP IP Gateway Release 6.0 with Cisco Unified MeetingPlace Release 6.1 FCS installations.
- Use Cisco Unified MeetingPlace H.323/SIP IP Gateway Release 6.1 with Cisco Unified MeetingPlace Release 6.1 MR1 installations.
