

Main page: [Cisco Unified MeetingPlace, Release 8.0](#)

Up one level: [Installation, Upgrade and Migration](#)

This section describes the order in which you should install and configure the components of the Cisco Unified MeetingPlace system for Release 8.0. It assumes that you are starting with a fresh system and not updating an existing system. For information about updating an existing system, see the [Upgrading to Cisco Unified MeetingPlace Release 8.0 from Cisco Unified MeetingPlace Release 7.0](#) section or [Migrating to Cisco Unified MeetingPlace Release 8.0 from Cisco Unified MeetingPlace Release 6.0 or from Cisco Unified MeetingPlace Express](#).

Determining Which Components to Install

- When you install the Application Server, you select the type of media server that you want to install. Based on that choice, follow the order in one of these sections:
 - ◆ [Hardware Media Server Order of Installation](#)
 - ◆ [Express Media Server Order of Installation](#)
- Depending on the web deployment model that you choose, you may not have to install and configure a web server. For complete information about the components required for your web deployment, see the *Planning Guide for Cisco Unified MeetingPlace Release 8.0* at [http://docwiki.cisco.com/wiki/Cisco Unified MeetingPlace%2C Release 8.0 -- Planning Your Deployment](http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace%2C_Release_8.0_--_Planning_Your_Deployment).
- You can also install optional integrations. See the [About Installing Integrations](#).

Before You Begin

For information about the requirements for each component, see the *System Requirements for Cisco Unified MeetingPlace Release 8.0* at

[http://docwiki.cisco.com/wiki/Cisco Unified MeetingPlace Release 8.0 -- System Requirements for Cisco Unified](http://docwiki.cisco.com/wiki/Cisco_Unified_MeetingPlace_Release_8.0_--_System_Requirements_for_Cisco_Unified)

Hardware Media Server Order of Installation

The following table describes the steps required to install and configure the Cisco Unified MeetingPlace system for Release 8.0.

Note: Only follow this installation if you are installing a Hardware Media Server. If your deployment will use an Express Media Server, follow the instructions in the [Express Media Server Order of Installation](#).

Step	Step Description	Re
1	<p>Install the Cisco Unified MeetingPlace Application Server software onto a Cisco MCS.</p> <p>Installing the Application Server also installs the Cisco Security Agent and the Media Server Administration (which is used for the Hardware Media Server) on the same Cisco MCS.</p>	<p>In Ci M A S e m</p>
2	<p>Physically install the Hardware Media Server chassis and blades.</p> <ul style="list-style-type: none"> • The Cisco Unified MeetingPlace 3515 Media Server audio and video interfaces are a fixed integrated chassis design. • The Cisco Unified MeetingPlace 3545 Media Server requires you to install the Audio and Video Blades. You can install a total of four Audio or Video Blades in this four slot chassis. 	<p>In Ci M H m</p>
3	<p>Configure the Hardware Media Server network interface through the serial port connection:</p> <ul style="list-style-type: none"> • Set the Audio Blade IP address, default gateway, subnet mask, and Ethernet link speed/duplexing. • Set the Video Blade IP address, default gateway, subnet mask, and Ethernet link speed/duplexing. • Set the SNMP community names. • Set the IP address of the audio port. 	
4	<p>Install the Cisco Unified MeetingPlace Web Server software and Gateway SIM onto a Cisco MCS.</p> <p>Note the following:</p> <ul style="list-style-type: none"> • Depending on your system configuration, you may choose to install the Cisco Unified MeetingPlace Web Server software on more than one Cisco MCS. • You may also choose to not install a web server at all. For information about deployments that do not use a web server, the <i>Planning Guide for Cisco Unified MeetingPlace Release 8.0</i> at http://docwiki.cisco.com/wiki/Cisco Unified MeetingPlace%2C Release 8.0 -- Planning Your Deploym 	

5	<p>Install the Cisco WebEx Node for MCS.</p> <p>Note: Technically, installing the Cisco WebEx Node for MCS is optional for external meetings. It is not required if your system is audio only. If your system will include web functionality with internal only meetings, you must install the Cisco WebEx Node for MCS.</p>	<p>In: Ci No me</p>
6	<p>Configure the Application Server from the Cisco Unified MeetingPlace Administration Center.</p>	<p>va</p>
7	<p>Configure the Web Server from the Cisco Unified MeetingPlace Web Administration.</p> <p>Note: This step is optional and only applies if you installed a web server.</p>	<p>va</p>
8	<p>Configure your system to use Cisco WebEx.</p>	<p>Int Ci M wi W</p>
9	<p>Configure the software settings for the Hardware Media Server.</p>	

--	--

Express Media Server Order of Installation

Note: Only follow this installation if you are installing an Express Media Server. If your deployment will use a Hardware Media Server, follow the instructions in the [Hardware Media Server Order of Installation](#).

Step	Step Description
1	<p>Install the Cisco Unified MeetingPlace Application Server software onto a Cisco MCS.</p> <p>Installing the Application Server also installs the Cisco Security Agent.</p>
2	<p>Install the Cisco Unified MeetingPlace Web Server software and Gateway SIM onto a Cisco MCS.</p> <p>Note the following:</p> <ul style="list-style-type: none"> • Depending on your system configuration, you may choose to install the Cisco Unified MeetingPlace Web Server software on more than one Cisco MCS. • You may also choose to not install a web server at all. For information about deployments that do not use a web server, the <i>Planning Guide for Cisco Unified MeetingPlace Release 8.0</i> at http://docwiki.cisco.com/wiki/Cisco Unified MeetingPlace%2C Release 8.0 -- Planning Your Deployment

3	<p>Install the Cisco WebEx Node for MCS</p> <p>Note: Technically, installing the Cisco WebEx Node for MCS is optional for external meetings. It is not required if your system is audio only. If your system will include web functionality with internal only meetings, you must install the Cisco WebEx Node for MCS.</p>	In Ci No mo
4	Configure the Application Server from the Cisco Unified MeetingPlace Administration Center.	va
5	<p>Configure the Web Server from the Cisco Unified MeetingPlace Web Administration.</p> <p>Note: This step is optional and only applies if you installed a web server.</p>	va
6	Configure your system to use Cisco WebEx.	Int Ci M wi W mo
7	Configure the settings for the Express Media Server.	

About Installing Integrations

You can install the integrations in any order.

Restriction

- You can only install one email notification integration on a particular Cisco MCS. Choose between Microsoft Outlook and IBM Lotus Notes. To install both email notifications, use two Cisco MCSs.

Integration	Description	Related Topics
-------------	-------------	----------------

<p>Cisco Unified MeetingPlace for Microsoft Outlook</p>	<p>Allows you to schedule and attend Cisco Unified MeetingPlace meetings from Microsoft Outlook and to receive email notifications in Microsoft Outlook for meetings scheduled from the Cisco Unified MeetingPlace web user portal.</p>	<ul style="list-style-type: none"> • <u>Enabling Cisco Unified MeetingPlace Scheduling from Microsoft Outlook</u> module • <u>Enabling Microsoft Outlook Calendar Notifications for Meetings Scheduled from the Cisco Unified MeetingPlace Web User Portal</u> module
