**Up one level:** [Planning Your Deployment](#)

The Cisco Unified MeetingPlace system supports a number of integrations. Use the information in this chapter to help you decide which integrations to install on your system and which hardware to use for each. The Cisco Unified MeetingPlace Release 8.0 system can have a maximum of 16 integration servers

## **Microsoft Outlook for Cisco Unified MeetingPlace Integration**

Microsoft Outlook for Cisco Unified MeetingPlace integrates the Cisco Unified MeetingPlace system with your Microsoft Exchange server. This integration allows end users to schedule and attend Cisco Unified MeetingPlace meetings by using their Microsoft Outlook clients as well as to receive e-mail notifications for meetings to which they have been invited. End users can choose to accept meeting invitations and have those meetings automatically display in their Microsoft Outlook calendars, or decline the invitations if they cannot attend the meetings.

The Microsoft Outlook for Cisco Unified MeetingPlace integration is automatically installed as part of the Application Server.

### **Related Topics**

For information on configuring the Microsoft Outlook for Cisco Unified MeetingPlace integration, see the online help in the administrator interface or the *Configuration Guide for Cisco Unified MeetingPlace Release 8.0* at

[http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products\\_installation\\_and\\_configuration\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_installation_and_configuration_guides_list.html).

## **Jabber for Cisco Unified MeetingPlace Integration**

With Jabber for Cisco Unified MeetingPlace, users can initiate Cisco Unified MeetingPlace meetings from a Jabber Messenger client. The meeting initiator selects invitees from a list of contacts and invites them to the meeting. The system sends an instant message that contains a hypertext meeting ID link to each invitee. To join the meeting, invitees click the hyperlink.

### **Related Topics**

For information on installing and configuring the Jabber for Cisco Unified MeetingPlace integration, see the *Integration Note for Installing and Configuring Jabber with Cisco Unified MeetingPlace Release 8.0* at

[http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod\\_installation\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_installation_guides_list.html)

## **IBM Lotus Notes for Cisco Unified MeetingPlace Integration**

IBM Lotus Notes for Cisco Unified MeetingPlace integrates the Cisco Unified MeetingPlace system with your IBM Lotus Domino Server. This integration allows end-users to schedule and attend Cisco Unified MeetingPlace meetings by using their IBM Lotus Notes for Cisco Unified MeetingPlace clients as well as to receive e-mail notifications for meetings to which they have been invited. End-users can choose to accept meeting invitations and have meetings automatically display in their IBM Lotus Notes for Cisco Unified MeetingPlace calendars, or decline the invitations if they cannot attend the meetings.

The IBM Lotus Notes for Cisco Unified MeetingPlace integration enables end users to perform the following tasks:

- Schedule Cisco Unified MeetingPlace meetings from their IBM Lotus Notes for Cisco Unified MeetingPlace calendars.
- Reschedule and delete Cisco Unified MeetingPlace meetings.

- Receive e-mail notifications for Cisco Unified MeetingPlace meetings, including update notifications for rescheduled meetings, which they can accept or decline.
- Attend Cisco Unified MeetingPlace meetings using click-to-attend web links in their meeting notifications or by clicking a Connect button in their IBM Lotus Notes for Cisco Unified MeetingPlace calendar entries.
- Change their Cisco Unified MeetingPlace user passwords (by using the Tools > Preferences menu option).

**Note:** Multiple clusters are not supported for the IBM Lotus Notes for Cisco Unified MeetingPlace integration .

#### **Related Topics**

For information on installing and configuring the IBM Lotus Notes for Cisco Unified MeetingPlace gateway, see the *Integration Note for Installing and Configuring IBM Lotus Notes for Cisco Unified MeetingPlace with Cisco Unified MeetingPlace Release 8.0* at

[http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod\\_installation\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_installation_guides_list.html)

### **Cisco Unified MeetingPlace Click-to-Conference with IBM Lotus Sametime Instant Messaging Integration**

With the Cisco Unified MeetingPlace Click-to-Conference with IBM Lotus Sametime Instant Messaging integration, users can initiate Cisco Unified MeetingPlace meetings from their IBM Lotus Sametime Release 7.5.1 through Release 8.0.2 clients.

#### **Related Topics**

For information on installing and configuring the Cisco Unified MeetingPlace Click-to-Conference with IBM Lotus Sametime Instant Messaging integration, see the *Integration Note for Installing and Configuring Cisco Unified MeetingPlace Click-to-Conference with IBM Lotus Sametime Instant Messaging* at

[http://www.cisco.com/en/US/docs/voice\\_ip\\_comm/meetingplace/7x/english/integration/sametime\\_integration\\_guide.html](http://www.cisco.com/en/US/docs/voice_ip_comm/meetingplace/7x/english/integration/sametime_integration_guide.html)

### **IBM Lotus Sametime Web Conferencing with Cisco Unified MeetingPlace Integration**

With the IBM Lotus Sametime Web Conference for Cisco Unified MeetingPlace integration, you can provide IBM Lotus Sametime users with integrated web and audio conferencing capabilities. The IBM Lotus Sametime infrastructure provides the web portion of the meeting, and Cisco Unified MeetingPlace serves as the audio bridge. Users schedule and attend meetings from the IBM Lotus Sametime meeting center, and the Sametime meeting room provides the integrated roster and in-session controls.

With this integration, an IBM Lotus Sametime Connect client can start an instant meeting, and invitees receiving the meeting invitation can join the meeting in the IBM Lotus Sametime Web meeting room and receive audio through Cisco Unified MeetingPlace.

### Related Topics

For information on installing and configuring the IBM Lotus Sametime Web Conference with Cisco Unified MeetingPlace integration, see the *Integration Note for Installing and Configuring IBM Lotus Sametime Web Conference with Cisco Unified MeetingPlace* at

[http://www.cisco.com/en/US/docs/voice\\_ip\\_comm/meetingplace/7x/english/integration/sametime\\_integration\\_guide.html](http://www.cisco.com/en/US/docs/voice_ip_comm/meetingplace/7x/english/integration/sametime_integration_guide.html)

## Integrating with Cisco Unity Connection

If you configure Cisco Unity Connection for calendar integration with Cisco Unified MeetingPlace, Cisco Unity Connection users can do these activities by phone:

- Join a meeting that is in progress.
- Hear a list of the participants for a meeting.
- Send a message to the meeting organizer.
- Send a message to the meeting participants.
- Set up reservationless meetings.

### Related Topics

For installation and configuration information, see the *System Administration Guide for Cisco Unity Connection* at [http://www.cisco.com/en/US/products/ps6509/prod\\_maintenance\\_guides\\_list.html](http://www.cisco.com/en/US/products/ps6509/prod_maintenance_guides_list.html).

For user-related information, see the *User Guide for the Cisco Unity Connection Phone Interface* at [http://www.cisco.com/en/US/docs/voice\\_ip\\_comm/connection/7x/user/guide/phone/7xcucugphonex.html](http://www.cisco.com/en/US/docs/voice_ip_comm/connection/7x/user/guide/phone/7xcucugphonex.html).

## Integrating with Cisco Unified Personal Communicator

When Cisco Unified MeetingPlace is integrated with both Cisco Unified Personal Communicator and Cisco WebEx, users who are in a Cisco Unified Personal Communicator conversation can quickly share data through a Cisco WebEx web meeting. The audio portion of the meeting is provided by Cisco Unified Personal Communicator.

### Related Topics

For information on configuring Cisco Unified Personal Communicator to work with Cisco Unified MeetingPlace, see the online help in the administrator interface or the *Configuration Guide for Cisco Unified MeetingPlace Release 8.0* at

[http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products\\_installation\\_and\\_configuration\\_guides\\_list.html](http://www.cisco.com/en/US/products/sw/ps5664/ps5669/products_installation_and_configuration_guides_list.html).

## Integrating with Cisco Unified IP Phones

You can integrate Cisco Unified MeetingPlace with Cisco Unified IP Phones so that users can see and manage their meetings on their phones through an application called Cisco Unified MeetingPlace PhoneView.

Cisco Unified MeetingPlace PhoneView offers users a convenient way to join meetings, start reservationless meetings, view a list of upcoming meetings, and view meeting details. After joining a meeting, a user can perform in-meeting operations such as locking the meeting, recording the meeting, viewing a list of participants, and muting or ejecting participants.

### Related Topics

## Hardware Used for Integrations

Integration	Server where installed
Microsoft Outlook for Cisco Unified MeetingPlace	Automatically installed on the Application Server
Jabber for Cisco Unified MeetingPlace	Installed on a Cisco MCS or Microsoft Windows server.  The Jabber XCP Server is installed on a separate Cisco MCS or Microsoft Windows server.
IBM Lotus Notes for Cisco Unified MeetingPlace	Installed on a Cisco MCS or Microsoft Windows server.  <b>Note:</b> Multiple clusters are not supported for the IBM Lotus Notes for Cisco Unified MeetingPlace integration.
Cisco Unified MeetingPlace Click-to-Conference with IBM Lotus Sametime Instant Messaging	Installed on a Cisco MCS or Microsoft Windows server.
IBM Lotus Sametime Web Conferencing	Installed on an IBM Lotus Sametime Server, which can be a Cisco MCS or Microsoft Windows server.
Cisco Unity Connection	No special hardware needed
Cisco Unified Personal Communicator	No special hardware needed
Cisco Unified IP Phones	No special hardware needed
