

Note: MeetingPlace customers with releases below 8.6MR1 will not be able to schedule meetings. MeetingPlace will need to be upgraded to MeetingPlace 8.6MR1 to be compatible with this change. The latest MeetingPlace software version can be downloaded at cisco.com.

Cisco Unified MeetingPlace provides a rich-media conferencing solution that includes the following:

- Voice, web, and video-conferencing capabilities
- Centralized access
- Real-time collaboration
- Integrated-network security that uses the existing telephony or IP-based infrastructure of your organization

Documentation for Administrators

- **Release Notes:**

http://www.cisco.com/en/US/products/sw/ps5664/ps5669/prod_release_notes_list.html

- **Planning Your Deployment:** Contains information to help you plan the installation of your Cisco Unified MeetingPlace Release 8.6 system.

- **Compatibility Matrix:** Lists the components and their release numbers that are compatible with the Cisco Unified MeetingPlace Application Server Release 8.6.

- **System Requirements:** Lists the requirements for Cisco Unified MeetingPlace, Release 8.6, including network requirements, hardware requirements, software requirements, end-user requirements for Web Conferencing, integration requirements, and migration requirements.
