

Cisco_Unified_Personal_Communicator_Soft_Phone_and_Desk_Phone_are_'Not_Active'

Back to Remote Call Control Main Page: [Known Issues: Remote Call Control](#)

When you sign into Cisco Unified Personal Communicator, and select Soft Phone or Desk Phone from the Phone Mode menu, the download fails and Cisco Unified Personal Communicator shows a Not Active state. The Server Health window in Cisco Unified Personal Communicator (select CUPC > Help > Show Server Health) confirms that the Softphone and Desk Phone are 'Not Active'.

What Caused it?

Typically, this failure happens if a primary extension is not configured on the End User Configuration window.

The Cisco Unified Personal Communicator log confirms this:

```
tt> No Primary Extension configured:</tt>
```

What Can You Do?

Go to Cisco Unified Communications Manager Administration and select User Management > End User. Configure the primary extension for the user.
