

Cisco_Unified_SIP_Proxy_--_XML_Schema_Information

Return to the main Cisco Unified SIP Proxy DocWiki page: [Cisco Unified SIP Proxy](#)

NOTE: This page contains the XML schema information used with Cisco Unified SIP Proxy Release 8.5 only.

In Cisco Unified SIP Proxy Release 8.5, we changed the format of the route table files that can be imported into Cisco Unified SIP Proxy. Route tables can now be imported by using the format below.

To use this new format, open a text editor and copy and paste the text below into it.
