Message Settings API

Administrator can use this API to create and update the message settings. All the parameters for message settings are present in call handler.

GET `https://<connection-server>/vmrest/users/<user-objectid>`

From the above URI get the call handler URI:

GET `https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>`

Please Find below the combination of values to select language for a call handler: URI for timezone:

`https://<connection-server>/vmrest/timezones.`

URI for installed Languages:

`https://<connection-server>/vmrest/installedlanguages.`

URI to get all language codes supported:

`https://<connection-server>/vmrest/languagemap.`

| | UseCallLanguage | UseDefaultLanguage | Language |
|------------------------------|-----------------|--------------------|-------------------|
| Use System Default Language | false | true | NULL/LanguageCode |
| Inherit Language from Caller | true | true/false | NULL/LanguageCode |

Cisco_Unity_Connection_Provisioning_Interface_(CUPI)_API--User_Message_Settings_API

| | | | |
|---------------------|-------|-------|---------------|
| Particular Language | false | false | Language Code |
|---------------------|-------|-------|---------------|

Listing Message Settings

GET <https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>>

The following is the response from the above *GET* request and the actual response will depend upon the information given by you:

```
<Callhandler>
<URI>/vmrest/handlers/callhandlers/287cdcc0-9f77-48e0-a7b1-0f9b1a5ac842</URI>
<CreationTime>2013-03-05T11:24:33Z</CreationTime>
<Language>1033</Language>
<Undeletable>false</Undeletable>
<LocationObjectId>42a9ab40-490d-4819-9bfb-8ddce4f430ff</LocationObjectId>
<LocationURI>/vmrest/locations/connectionlocations/42a9ab40-490d-4819-9bfb-8ddce4f430ff</LocationURI>
<EditMsg>true</EditMsg>
<IsPrimary>true</IsPrimary>
<OneKeyDelay>1500</OneKeyDelay>
<ScheduleSetObjectId>b8a03d12-d425-4cdb-ba36-88e64bf16432</ScheduleSetObjectId>
<ScheduleSetURI>/vmrest/schedulesets/b8a03d12-d425-4cdb-ba36-88e64bf16432</ScheduleSetURI>
<SendUrgentMsg>1</SendUrgentMsg>
<MaxMsgLen>300</MaxMsgLen>

</CallHandlerOwnerURI>
</Callhandler>
```

Response Code: 200

JSON Example

```
GET https://<connection-server>/vmrest/handlers/callhandlers/<CallHandlerObjectId>
Accept: application/json
Connection: keep-alive
```

Cisco_Unity_Connection_Provisioning_Interface_(CUPI)_API--User_Message_Settings_API

Response Code: 200

Updating Message Settings

The following is an example of the PUT request that updates message settings:

```
PUT https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>

<Callhandler>
  <EditMsg>true</EditMsg>
  <MaxMsgLen>1000</MaxMsgLen>
  <AfterMessageAction>1</AfterMessageAction>
  <SendUrgentMsg>2</SendUrgentMsg>
  <UseCallLanguage>false</UseCallLanguage>
  <SendSecureMsg>false</SendSecureMsg>
  <SendPrivateMsg>1</SendPrivateMsg>
  <PlayAfterMessage>2</PlayAfterMessage>
</Callhandler>
```

The following is the response from the above *PUT* request and the actual response will depend upon the information given by you:

Response Code: 204

JSON Example

```
PUT https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>
Accept: application/json
Content-type: application/json
Connection: keep-alive

{
  "AfterMessageAction": "2",
  "AfterMessageTargetConversation": "SystemTransfer"
}
```

The following is the response from the above *PUT* request and the actual response will depend upon the information given by you:

Response code: 204

Updating after Message Actions

Example 1: Call Handler

```
PUT https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>

<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>PHGreeting</AfterMessageTargetConversation>
  <AfterMessageTargetHandlerObjectId>c1fc1029-55f4-40dc-a553-40b75664ed8a</AfterMessageTargetHandlerObjectId>
</Callhandler>
```

The following is an example of the GET request that shows the call handler object ID:

```
GET https://<connection-server>/vmrest/handlers/callhandlers
```

Cisco_Utity_Connection_Provisioning_Interface_(CUPI)_API--_User_Message_Settings_API

The following is the response from the *PUT* request and the actual response will depend upon the information given by you:

Response Code: 204

Example 2: Interview Handler

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetHandlerObjectId>c1fc1029-55f4-40dc-a553-40b75664ed8a</AfterMessageTargetHandlerObjectId>
  <AfterMessageTargetHandlerObjectId>c1fc1029-55f4-40dc-a553-40b75664ed8a</AfterMessageTargetHandlerObjectId>
</Callhandler>
```

The following is an example of the GET request that shows the interview handler template object ID:

```
GET https://<connection-server>/vmrest/handlers/interviewhandlers
```

The following is the response from the *PUT* request and the actual response will depend upon the information given by you:

Response Code: 204

Example 3: Directory Handler

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>AD</AfterMessageTargetConversation>
  <AfterMessageTargetHandlerObjectId>c1fc1029-55f4-40dc-a553-40b75664ed8a</AfterMessageTargetHandlerObjectId>
</Callhandler>
```

The following is an example of the GET request that shows the interview handler template object ID:

```
GET https://<connection-server>/vmrest/handlers/directoryhandlers
```

The following is the response from the *PUT* request and the actual response will depend upon the information given by you:

Response Code: 204

Example 4: Conversation

Request Body: for broadcast message administrator

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>BroadcastMessageAdministrator</AfterMessageTargetConversation>
</Callhandler>
```

The following is the response from the *PUT* request for broadcast message administrator and the actual response will depend upon the information given by you:

Response Code: 204

Request Body: for caller system transfer

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
```

Cisco_Utity_Connection_Provisioning_Interface_(CUPi)_API--_User_Message_Settings_API

```
<AfterMessageTargetConversation>SystemTransfer</AfterMessageTargetConversation>
</Callhandler>
```

The following is the response from the *PUT* request for caller system transfer and the actual response will depend upon the information given by you:

Response Code: 204

Request Body: for greeting administrator

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>GreetingAdministrator</AfterMessageTargetConversation>
</Callhandler>
```

The following is the response from the *PUT* request for greeting administrator and the actual response will depend upon the information given by you:

Response Code: 204

For sign in

```
<Callhandler>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>SubSignIn</AfterMessageTargetConversation>
</Callhandler>
```

The following is the response from the *PUT* request for sign in and the actual response will depend upon the information given by you:

Response Code: 204

For system transfer:

```
Request Body:
<CallhandlerPrimaryTemplate>
  <AfterMessageAction>2</AfterMessageAction>
  <AfterMessageTargetConversation>SubSysTransfer</AfterMessageTargetConversation>
</CallhandlerPrimaryTemplate>
```

The following is the response from the *PUT* request for user system transfer and the actual response will depend upon the information given by you:

Response Code: 204

JSON Example

```
PUT https://<connection-server>/vmrest/handlers/callhandlers/<CallhandlerObjectId>
Accept: application/json
Content-type: application/json
Connection: keep-alive
Request Body:
{
  "AfterMessageAction": "2",
  "AfterMessageTargetConversation": "SystemTransfer"
}
```

Cisco_Unity_Connection_Provisioning_Interface_(CUPI)_API--_User_Message_Settings_API

The following is the response from the above *PUT* request and the actual response will depend upon the information given by you:

Response Code: 204

Explanation of Data Fields

| Parameter | Data Type | Operations | Comments |
|--------------------|-----------|------------|--|
| MaxMsgLen | Integer | Read/Write | <p>The maximum recording length (in seconds) for messages left by unidentified callers.</p> <p>Default value : 300 Range: 1-3600</p> |
| EditMsg | Boolean | Read/Write | <p>Allows callers to be prompted to listen to, add to, rerecord, or delete their messages.</p> <p>Values can be: ? false: Callers cannot edit messages ? true: Callers can edit messages Default value: true</p> |
| UseDefaultLanguage | Boolean | Read/Write | <p>Values can be:</p> <ul style="list-style-type: none">• false: The language is the default language defined for the call handler template.• true: The language is derived from the location to which this call handler template belongs. <p>Default value: true</p> |
| UseCallLanguage | Boolean | Read/Write | <p>This flag allows that language to be the language used by handlers in the system to play prompts for users.</p> <p>Values can be:</p> <ul style="list-style-type: none">• false: Do not use the language specified by the system call routing rule to play prompts for users• true: Use the language specified by the system call routing rule to play prompts for users <p>Default value: false</p> |
| SendUrgentMsg | Integer | Read/Write | A flag indicating whether an unidentified caller can mark a message as "urgent." Values can be: |

Cisco_Unity_Connection_Provisioning_Interface_(CUPI)_API--_User_Message_Settings_API

| | | | |
|------------------|---------|------------|--|
| | | | <ul style="list-style-type: none"> • 0: Never - messages left by unidentified calls are never marked urgent. • 1: Always - all messages left by unidentified callers are marked urgent. • 2: Ask - Cisco Unity Connection asks unidentified callers whether to mark their messages urgent. <p>Default Value: 0</p> |
| SendPrivateMsg | Integer | Read/Write | <p>Determines if an outside caller can mark their message as private.</p> <p>Values can be:</p> <ul style="list-style-type: none"> • 0: Never - No messages are marked private. • 1: Always - All messages are marked private. • 2: Ask - Ask the outside caller if they wish to mark the message as private. <p>Default Value: 0</p> |
| SendSecureMsg | Boolean | Read/Write | <p>A flag indicating whether an unidentified caller can mark a message as "secure."</p> <p>Values can be:</p> <ul style="list-style-type: none"> • false: Never - messages left by unidentified calls are never marked secure. • true: Always - all messages left by unidentified callers are marked secure. <p>Default Value: false</p> |
| PlayAfterMessage | Integer | Read/Write | <p>Indicates whether the Sent Message Prompt Recording referenced by Post Greeting</p> <p>Values can be:</p> <ul style="list-style-type: none"> • 0: Do not play recording • 1: System default recording • 2: Play recording |

Cisco_Unity_Connection_Provisioning_Interface_(CUPI)_API--_User_Message_Settings_API

| | | | |
|-----------------------------------|-------------|------------|--|
| | | | Default value: 0 |
| AfterMessageAction | Integer | Read/Write | <p>AfterMessageAction can only accept integer with the following values:</p> <ul style="list-style-type: none"> • 0: Ignore • 1: Hang up • 2: Goto • 3: Error • 4: TakeMsg • 5: SkipGreeting • 6: RestartGreeting • 7: TransferAltContact • 8: Route from next call routing rule. |
| AfterMessageTargetHandlerObjectId | String (36) | Read/Write | The unique identifier of the specific object to send along to the target conversation. |
| AfterMessageTargetConversation | String(64) | Read/Write | The name of the conversation to which the caller is routed. |
| Language | Integer | Read/Write | The Windows Locale ID (LCID) that identifies the language that Cisco Unity Connection plays for system prompts. |
