

Conflicts in Datastore Control Center history

Problem Summary	With high availability, messages appear in the comment column in the subscription agent history. To see the message from Cisco Unified CCX Administration, select Datastore Control Center > History for a subscription agent.
Error Message	A message similar to <i>Downloaded 111 data changes (0 inserts, 111 updates, 0 deletes, 111 conflicts)</i> appears.
Possible Cause	To support high availability, SQL merge replication is being used to replicate data between the subscriber node and the publisher. As part of this, SQL logs these messages in the subscription agent history.
Recommended Action	No user action required.
Release	Release 7.0(1)
Associated CDETS #	None.
