

## Conflicts in Datastore Control Center history

<b>Problem Summary</b>	With high availability, messages appear in the comment column in the subscription agent history. To see the message from Cisco Unified CCX Administration, select <b>Datastore Control Center &gt; History</b> for a subscription agent.
<b>Error Message</b>	A message similar to <i>Downloaded 111 data changes (0 inserts, 111 updates, 0 deletes, 111 conflicts)</i> appears.
<b>Possible Cause</b>	To support high availability, SQL merge replication is being used to replicate data between the subscriber node and the publisher. As part of this, SQL logs these messages in the subscription agent history.
<b>Recommended Action</b>	No user action required.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
