

## Create\_Troubleshooting\_Tips

Welcome to Contact Center's Create Troubleshooting Tips Page!

To contribute to this collection, follow this procedure:

1. Log into DocWikidev using your Cisco.com credentials.
2. Enter the name of your new tip in the input box below and click **Create Troubleshooting Tip**. A new page opens.
3. Change the <Tip Title> and the information for each field as required.
4. Copy the required category (or categories) from the following list and add it to the bottom of your new page and click **Save**.

- ◇ Unified CCE
  - [[Category:Unified CCE, Release 7.5(1)]]
  - [[Category:Unified CCE, Release 8.0(1)]]

## Create\_Troubleshooting\_Tips

- [[Category:Cisco Unified Web Interaction Manager, Release 4.2(x)]]
- ◇ WFO option (QM and WFM)
- [[Category:Cisco Unified Workforce Optimization]]

**Tip 1:** Contact Chittal or Chris if you need help with setting up a new Category.

**Tip 2:** If your category and pages are set up accurately, your newly-created tip will automatically show up in the required product/release category.

**Tip 3:** See the [Unified Expert Advisor, Release 7.6\(1\)](#) page for different samples.

 **Note:** If you enter the name of a tip that already exists, the existing page with that title will appear in the edit window.
