

Data_Resync_Result_Page_Still_Shows_Red_X_Eventhough_All_Inconsistencies_are_Corrected

Problem Summary	After performing Data Resync, result page display ?Mismatch Detected? message for attributes even though inconsistencies are corrected.
Error Message	NA
Possible Cause	After performing Data Resync even though the inconsistency is corrected, ?Mismatch Detected? message will be displayed with the reason, along with ?Mismatch Corrected? message for the scenarios: Attribute Missing/Renamed/Recreated in Cisco Unified CM. This is meant to convey the reason for mismatch after the Data Resync as well.
Recommended Action	NA
