

Deleting license from IPS

Configuration

1. Login to the sensor using a service privilege account and issue the following command from the bash prompt:
2. su
3. cd /usr/cids/idsRoot/shared/
4. rm /usr/cids/idsRoot/shared/ips.lic
5. Apply a valid license key file

Related Information

This would be required if there is some licensing issue or we are unable to remove the existing trial license.
