

## During the backup process, the backup window is accidentally closed

<b>Problem Summary</b>	During the backup process, the backup window is accidentally closed, which results in the backup process getting terminated abruptly.
<b>Error Message</b>	Fail to release bootstrap mutex.
<b>Possible Cause</b>	Unknown.
<b>Recommended Action</b>	When the backup is terminated abruptly, the Cluster Mutex lock is not released. The lock gets automatically released after some time. Therefore, wait for 5-10 minutes and initiate the backup process again.
<b>Release</b>	Release 7.0(1)
<b>Associated CDETS #</b>	None.
