

During the backup process, the backup window is accidentally closed

Problem Summary	During the backup process, the backup window is accidentally closed, which results in the backup process getting terminated abruptly.
Error Message	Fail to release bootstrap mutex.
Possible Cause	Unknown.
Recommended Action	When the backup is terminated abruptly, the Cluster Mutex lock is not released. The lock gets automatically released after some time. Therefore, wait for 5-10 minutes and initiate the backup process again.
Release	Release 7.0(1)
Associated CDETS #	None.
