

Error: "Could not start print job" while Printing from HRC

HRC Printing Unsuccessful

Problem Summary	While printing an HR report from the HRC client "could not start print job" error is thrown on the print spooler window. Seen on Win 7 and Win XP clients.
Error Message	Could not start print job.
Possible Cause	None.
Recommended Action	1. Add a network printer to another host in the same network. 2. Share this printer so it becomes accessible to other machines on the network. 3. Retry printing. Note: This newly added printer will not be managed by the print server.
Release	Release 8.0, Release 8.5
Associated CDETS #	CSCtn20575.
