

<Error associating script with application>

Problem Summary	Error while associating script loaded through AAR with application
Error Message	UNABLE_LOAD_SCRIPT:Unable to load script: Script=<<Script Name>> with ClassNotFoundException in MADM
Possible Cause	Custom step is being used, which is not supported since 4.0.
Recommended Action	Remove custom step from the script and replace it with scripting using expression framework.
Release	8.0
Associated CDETS #	CSCtq90670

Category:Unified CCX, Release 8.0
