

FACT_delete_scans

To delete one or more scans from the repository, use the **delete scans** command.

delete scans [*scans*]

Syntax Description

<i>scans</i>	Deletes the specified scan, the specified range of scans, or the latest scan performed.
--------------	---

Command Default

No default behavior or values.

Usage Guidelines

Range numbers correspond to the numbers in the **show history** command.

Examples

The following example shows deleting scans 2 and 3 from the repository:

```
fact> show history
```

```
index current type          date                               subnet-manager
-----
 1         fabric      2008-04-17 10:44:02 PDT      host01
 2         fabric      2008-04-17 10:44:08 PDT      host01
 3         fabric      2008-04-17 10:44:14 PDT      host01
 4         Y      tech-support  2008-04-17 10:44:47 PDT      host01
```

```
fact> delete scans 2-3
```

```
Proceed with scan delete [Y/n]? yes
```

```
fact> show history
```

```
index current type          date                               subnet-manager
-----
 1         fabric      2008-04-17 10:44:02 PDT      host01
```
