

FACT_import_scan

To add the scan to the current repository, use the **import scan** command.

import scan from *{file}*

Syntax Description

from	Identifies the source set.
<i>file</i>	Indicates the file from which the scan is imported.

Command Default

No default behavior or values.

Examples

The following example shows importing the scan previously exported to the file "myscan," making it the current scan:

```
fact> import scan from myscan  
Overwrite existing scan in repository [Y/n]? yes
```
