

File Manager in partial service

| | |
|---------------------------|--|
| Problem Summary | File Manager is found to be in PARTIAL_SERVICE. A message similar to the following displays in the MIVR/MADM log messages. |
| Error Message | <i>Class=class.com.cisco.doc.UserDocument.Synchronization status=2005-8-7 14:02:05.36:Synching 1173: Aug 07 14:02:05.797 EDT %MADM-FILE_MGR-6-RECOVERY_DETECTED:THREAD:EventQueue.DispatchThread-0-1: Synchronization from Repository to local disk not performed.</i> |
| Possible Cause | RECOVERY of the node is in progress. File Manager does not perform the synchronization of files from RDS (DB) during recovery, and it puts itself in PARTIAL_SERVICE until it is notified that RECOVERY is complete. |
| Recommended Action | None. Working as designed. |
| Release | Release 7.0(1) |
| Associated CDETS # | None. |
