

## Receiving Bootstrap Warning Error

<b>Problem Summary</b>	When adding the bootstrap service to the gateway you get bootstrap warnings.
<b>Error Message</b>	<pre>(config-app)# service bootstrap flash:bootstrap.tcl (config-app-param)# paramspace english language en (config-app-param)# paramspace english index 0 (config-app-param)# paramspace english location flash (config-app-param)# param CVPcallserver-primary 10.3.3.14 Warning: parameter CVPcallserver-primary has not been registered under bootstrap name (config-app-param)# paramspace english prefix en (config-app-param)# param CVPcallserver-port 8000 Warning: parameter CVPcallserver-port has not been registered under bootstrap namesp (config-app-param)# param CVPcallserver-backup 10.3.3.14 Warning: parameter CVPcallserver-backup has not been registered under bootstrap name</pre>
<b>Possible Cause</b>	Verify that the service is configured correctly.
<b>Recommended Action</b>	<p>When this error is received, it is usually a benign warning event. Verify that the service has been configured correctly. To view the configuration, type the following command:</p> <pre>router&gt;# show run</pre> <p>The output should still show that it has been configured, as the example below shows.</p> <pre>service bootstrap140 flash:bootstrap.tcl param CVPcallserver-backup 10.3.3.14 paramspace english language en paramspace english index 0 paramspace english location flash paramspace english prefix en param CVPcallserver-primary 10.3.3.14 param CVP-port 8000</pre>
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
