HTTP Status 500 message displays when opening Cisco MediaSense Administration after system restart

Problem Summary	This exception message displays for the first few minutes after restarting Cisco MediaSense Release 9.0(1a) in a Cisco Services Ready Engine (SRE) deployment.
Error Message	HTTP Status 500 The server encountered an internal error that prevented it from fulfilling this request.
Possible Cause	Resources of an SRE are relatively limited and MediaSense runs much slower on them than on other types of nodes. Because of this some resources will not be ready for a few minutes.
Recommended Action	Wait a few minutes and try again.
Release	9.0(1a)
Associated CDETS #	None
