

Gets the following exception while uploading prompt, grammar, document using editor steps inside the workflow script

Problem Summary	Gets the following exception while uploading prompt, grammar, document using editor steps inside the workflow script. java.sql.SQLException: [Microsoft][ODBC SQL Server Driver][SQL Server]String or binary data would be truncated. 26305033: Apr 17 21:09:59.504 CST %MIVR-LIB_JDBC-7-UNK: at sun.jdbc.odbc.JdbcOdbc.createSQLException(JdbcOdbc.java:6958
Error Message	java.sql.SQLException: [Microsoft][ODBC SQL Server Driver][SQL Server]String or binary data would be truncated. 26305033: Apr 17 21:09:59.504 CST %MIVR-LIB_JDBC-7-UNK: at sun.jdbc.odbc.JdbcOdbc.createSQLException(JdbcOdbc.java:6958
Possible Cause	There is a last modified user name in the corresponding file and folder table. This name is formed by combining first and last name. The maximum length for the name field is 30. This exception comes when the name length exceeds 30.
Recommended Action	The combined length of first name and last name can not exceed 29. The first name and last name should be changed accordingly.
Release	Release 7.0, Release 5.0
Associated CDETS #	None
