

## Displaying Edited Records within Configuration Tools

<b>Problem Summary</b>	If an edit is made and saved in one configuration tool while another configuration tool is open, the edited data will not display in the other configuration tool window (or selection boxes) until you click <b>Retrieve</b> .
<b>Error Message</b>	No message
<b>Possible Cause</b>	Clicking <b>Retrieve</b> not only retrieves data when you first open a configuration tool, but also refreshes (updates the display of) the data that is currently in the database. The configuration tools do not automatically update the display of data when it is changed in the database unless you click <b>Save</b> or <b>Retrieve</b> .
<b>Recommended Action</b>	Click <b>Retrieve</b> .
<b>Release</b>	Release 7.5(1) and 8.0
<b>Associated CDETS #</b>	None.
