

**If Switch Version Fails on Unified CCX, Reboot the Server**

<b>Problem Summary</b>	Switch version (to higher or lower version) fails on a HA/SA Unified CCX setup.
<b>Error Message</b>	<i>Sync after switch version failed</i>
<b>Possible Cause</b>	The Unified CCX switch version can fail for many reasons, including network failure, DB service down, and so on when performing switch version on a node.
<b>Recommended Action</b>	Reboot the Unified CCX server because many services may not run after a switch version failure.
<b>Release</b>	All Unified CCX versions later than Release 8.0(1)
<b>Associated CDETS #</b>	None
