

## Reporting Password Error During Installation

<b>Problem Summary</b>	When you specify the Reporting password during Reporting installation, you encounter the following message:
<b>Error Message</b>	Error 2245 while running: changing default password for user Informix.
<b>Possible Cause</b>	The password security policy on the machine on which you are installing Reporting conflicts with Unified CVP Reporting password requirements. Most likely, the machine password security policy has a minimum password age greater than 0 or the minimum password length is greater than 13 characters.
<b>Recommended Action</b>	On the machine on which you are installing Reporting, abort the installation process. Open the local Security Policy control panel ( <b>Control Panel &gt; Administrative Tools &gt; Local SecurityPolicy</b> ) and examine the Password Policy ( <b>Security Settings &gt; Account Policies &gt; PasswordPolicy</b> ). If the password policy on your machine conflicts with Unified CVP Reporting password requirements, make the appropriate adjustments. Restart the installation process.
<b>Release</b>	Release 7.0(2)
<b>Associated CDETS #</b>	None.
