

# Class Selector (QoS - CS)

## Definition

A Class Selector (CS) is a DiffServ-architecture marking that corresponds to an IP Precedence marking:

<b>DSCP Value</b>	<b>Binary Value</b>	<b>IP Precedence Value</b>
Default	000000	0
CS1	001000	1
CS2	010000	2
CS3	011000	3
CS4	100000	4
CS5	101000	5
CS6	110000	6
CS7	111000	7
