

Invalid License MAC address error at time of License upload

Problem Summary	Invalid License MAC address error at time of License upload.
Error Message	Error: The Cisco Unified CCX "feature name*" of "filename" has invalid MAC address[LicenseMAC from License File].
Possible Cause	UCCX server License MAC is different than the License MAC with which License files are generated.
Recommended Action	run "show status" command from Unified CCX 8.0 Admin CLI. Check for License MAC in the output. If this License MAC is different than the one given in License file, contact UCCX product marketing to get new License files with correct License MAC.
