

**JavaScript <, >, & symbols in vxml var expr declaration**

<b>Problem Summary</b>	How to use JavaScript <, >, & symbols in vxml var expr declaration
<b>Error Message</b>	
<b>Possible Cause</b>	wrong use of java script symbols.
<b>Recommended Action</b>	<p>Many JavaScript operators (&lt;, &gt;, &amp;, &amp;&amp;) have special significance in XML, thus their equivalent entities must be used in expressions and conditions. For example operators and their corresponding entities are:</p> <p>&lt; &amp;(ampersand)lt; &gt; &amp;(ampersand)gt; &amp; &amp;(ampersand)amp; " &amp;(ampersand)quot;</p> <p>remove the 'ampersand' while using the same.</p>
<b>Release</b>	Release 8.0(1)
