

JavaScript <, >, & symbols in vxml var expr declaration

Problem Summary	How to use JavaScript <, >, & symbols in vxml var expr declaration
Error Message	
Possible Cause	wrong use of java script symbols.
Recommended Action	<p>Many JavaScript operators (<, >, &, &&) have special significance in XML, thus their equivalent entities must be used in expressions and conditions. For example operators and their corresponding entities are:</p> <p>< &(ampersand)lt; > &(ampersand)gt; & &(ampersand)amp; " &(ampersand)quot;</p> <p>remove the 'ampersand' while using the same.</p>
