

Migration: Gauge value update failed

Problem Summary	After the migration, when you launch a view the system displays an error message.
Error Message	Gauge value update failed. The footer value is null or not a number.
Possible Cause	The CUIS 7.x report field to which the gauge view is applied does not have a footer formula set.
Recommended Action	Set the footer formula in the CUIC 8.x system using the Report definition field properties screen.
Release	Release 8.0(x)
Associated CDETS #	None
