

NBAR2

NBAR2 Home Page

Welcome to **NBAR2 DocWiki**.

Using NBAR2, Cisco's innovative Deep Packet Inspection (DPI) technology, Cisco ASR 1000, ISR-G2 and Cisco Wireless Controllers can identify over 1000 applications within the traffic flow. In order to address the evolving nature of applications, NBAR2's application signature can be updated through Protocol Pack while the router is in-service.
