

Not able to activate config datastore from node2 of a CCX HA setup

Problem Summary	In the node2 MCVD log getting the following Exception: Error on setting up linked servers on 1 th attempt due to Login failed for user 'cdsrepluser'. Reason: Not associated with a trusted SQL Server connection. OR Error on setting up linked servers on 1 th attempt due to Login failed for user '(null)'. Reason: Not associated with a trusted SQL Server connection.
Error Message	Error on setting up linked servers on 1 th attempt due to Login failed for user '(null)'. Reason: Not associated with a trusted SQL Server connection.
Possible Cause	In 6.0 we support mixed mode authentication for SQL Server. Changing the mode of authentication to Windows Authentication will result into this issue.
Recommended Action	Change the mode of authentication back to mixed mode in both the nodes and restart the SQL services. Try the config datastore activation again from the appadmin.
Release	Release 7.0, Release 5.0
