

## Not able to activate config datastore from node2 of a CCX HA setup

<b>Problem Summary</b>	<p>In the node2 MCVD log getting the following Exception:</p> <p>Error on setting up linked servers on 1 th attempt due to Login failed for user 'cdsrepluser'. Reason: Not associated with a trusted SQL Server connection.</p> <p>OR</p> <p>Error on setting up linked servers on 1 th attempt due to Login failed for user '(null)'. Reason: Not associated with a trusted SQL Server connection.</p>
<b>Error Message</b>	Error on setting up linked servers on 1 th attempt due to Login failed for user '(null)'. Reason: Not associated with a trusted SQL Server connection.
<b>Possible Cause</b>	In 6.0 we support mixed mode authentication for SQL Server. Changing the mode of authentication to Windows Authentication will result into this issue.
<b>Recommended Action</b>	Change the mode of authentication back to mixed mode in both the nodes and restart the SQL services. Try the config datastore activation again from the appadmin.
<b>Release</b>	Release 7.0, Release 5.0
<b>Associated CDETS #</b>	None
