

## Operation Console (OAMP): Adding a gateway in OAMP gives error message if gateway?s hostname starts with a number

<b>Problem Summary</b>	In OAMP, when a gateway?s hostname that starts with a number is entered, CVP gives an error message.
<b>Error Message</b>	Hostname is invalid. Valid hostnames contain uppercase and lowercase alphanumeric characters, period, underscore, and dash.
<b>Possible Cause</b>	The hostname entered starts with a number. It must start with an alphabet character, not a number.
<b>Recommended Action</b>	Check the gateway?s host name. If the hostname starts with a number, change the hostname so that it starts with an alphabet character instead.
<b>Release</b>	8.0(1), 8.0(2), and 8.5(1)
<b>Associated CDETS #</b>	None.
