

Excessive "No Default Label Configured" Errors in Router Log Viewer

Problem Summary	An excessive number of "No Default Label Configured" Errors appear in the Router Log Viewer
Error Message	N/A
Possible Cause	Sometimes Dialer reservation requests are rejected due to no available agents. This is normal, but a large number of rejected requests can clog off the Router Log Viewer with errors.
Recommended Action	Use a Release node at the end of the Agent Reservation Script to avoid these errors.
Release	Release 7.5(1) and 8.0
Associated CDETS #	None.
