

## Purging campaigns overnight

<b>Problem Summary</b>	Campaigns need to be purged overnight
<b>Error Message</b>	
<b>Possible Cause 1</b>	Overwrite option not enabled for the import rule, but dialing list tables needs to be purged over night
<b>Recommended Action 1</b>	<p>1) Use two import rules, ImportA and Import B. Following is the pre-conditions that has to be accomplished</p> <ul style="list-style-type: none"> <li>a) ImportA and ImportB should have the same Target Table Name.</li> <li>b) The import definition for both the import rules must be similar.</li> <li>a) ImportA is the actual import rule which is tagged to a query rule and populated</li> <li>b) ImportB (with over-write option enabled) needs to be scheduled nightly to purge</li> <li>e) The Import file contents for the ImportB should be empty.</li> </ul> <p>2) Following is the method to purge the dialing lists.</p> <ul style="list-style-type: none"> <li>a) In procmon there is a command bacmudl /queryrule [queryruleid]. This command</li> <li>b) This can be executed from command line as follows, procmon &lt;instance name&gt; I</li> </ul> <p>The input file needs to have the bacmudl command. (This complete command can be found in the procmon manual when required)</p> <p>Use the above mentioned steps to purge the import table and rebuild the dialing lists nightly.</p> <ul style="list-style-type: none"> <li>• ♦ Note: Make sure that you first execute Dummy (Import B) rule and then procmon command</li> </ul>
<b>Release</b>	Release 7.5(1) and 8.0
<b>Associated CDETS #</b>	None.
