

Outbound Contacts Not being dialed after failover

Problem Summary	Some of the Outbound contacts do not get dialed after failover
Error Message	None
Possible Cause	The outbound contacts were retrieved into the Outbound memory initially. But, during failover and post the change of mastership, Outbound SS moves the records to unknown state.
Recommended Action	This is an expected behavior and Outbound Subsystem will dial the contacts the next day.
Release	Release 8.0(1)
