PIM Connects but Auto-configuration Incomplete or Other Errors

Problem Summary	The PIM is connected and Skill Groups are created on the Unified ICM, but no Services are configured
Error Message	None.
Possible Cause	The configuration parameter field may be wrongly configured.
Recommended Action	Check if the /ExtendedAgent is specified in the configuration parameter field of the Peripheral tab in the PG explorer. Verify that the configuration parameter field of the LogicalController is blank.
Release	Release 7.6(1).
Associated CDETS #	None.
