

Patch Installer aborts due to CCE service control manager running

Problem Summary	The Patch Installer aborts if the CCE service control manager is running.
Error Message	Patch Installer generates a dialog box indicating that an ICM executable is running, and must be stopped for the installer to continue. Patch Installer then aborts.
Possible Cause	ICM applications running during the execution of patch installer.
Recommended Action	Close any and all ICM applications and rerun the patch installer.
Release	8.5.1.
Associated CDETS #	None
